Spruce Feinstein

Staff Software Engineer

952 Stone St, Cave Springs, AR 72718 | 479.445.3180 | sprucefeinstein@gmail.com

Summary

Staff Software Engineer with 10+ years of experience designing and delivering scalable, cloud-native systems. Proven leadership in SaaS platforms, microservices, and event-driven architectures. Passionate about driving engineering excellence through DevOps, distributed systems, and modern web technologies.

Skills

Languages: JavaScript, TypeScript, SQL, .NET, Java

Frameworks/Libraries: Node.js, React, React Native, Express

DevOps/Infrastructure: Docker, Kubernetes, Terraform, CI/CD, AWS **Datastores**: PostgreSQL, MongoDB, Cassandra, DynamoDB, Snowflake

Architecture: Distributed Systems, SOA, Kafka, TDD

Experience

Shaper Tools — Staff Software Engineer

October 2022 – Present, Remote

- Leading development of web services for robotic woodworking tools and digital fabrication apps using **Node.js**, **React**, and **Kubernetes**
- Architecting and maintaining a browser-based vector design tool
- Managing IoT and embedded device telemetry, OTA flows, and fleet management
- Designing scalable user file storage platforms leveraging PostgreSQL, DynamoDB, and MongoDB

RaiseRight — Senior Software Engineer

October 2021 - October 2022, Remote

- Developed and maintained a high-volume eCommerce platform handling \$800M+ in annual transactions using **React**, **React Native**, and .**NET**
- Focused on transactional integrity and operational security

Nacelle — Lead Architect

April 2021 – October 2021, Remote

- Designed and built a high-performance, event-driven SaaS platform for headless eCommerce using **Kafka**, **Cassandra**, and **Node.js**
- Developed a scalable **Kafka**-based data ingestion pipeline supporting millions of daily active users

J.B. Hunt Transport Services — Senior Software Engineer

April 2020 – April 2021, Arkansas

• Full-stack developer on a flagship React Native app backed by Java microservices

- Led cloud migration from on-prem to **Kubernetes**, modernizing microservices and improving scalability
- Championed team upskilling in **Docker**, **Kubernetes**, and **cloud-native** practices

RevUnit — **Software Architect**

October 2016 - April 2020, Arkansas

- Led development teams and collaborated directly with Fortune 500 clients
- Acted as a solutions architect with strong focus on **DevOps** and system reliability
- Implemented infrastructure and deployment pipelines for high availability

CaseStack — **Software Engineer**

April 2015 – September 2016, Arkansas

- Designed and developed a transportation management system using the **MEAN** stack
- Managed Kubernetes-based infrastructure for efficient service deployment
- Focused on building disruptive logistics technology

J.B. Hunt Transport Services — Programmer

December 2014 - April 2015, Arkansas

- Assisted in developing and maintaining **Java**-based **microservices** to integrate MercuryGate with internal transportation management systems (TMS)
- Supported data exchange workflows between logistics platforms by implementing **REST APIs**, **message queues**, and error-handling routines in a **distributed architecture**

Trutrak Flight Systems — Software Engineer

January 2014 - December 2014, Arkansas

- Contributed to the full lifecycle development of **embedded avionics** systems, including GPS units and autopilot controllers for experimental aircraft
- Designed schematics, laid out PCBs, and developed low-level **firmware** to control aircraft systems, with hands-on involvement in hardware testing and validation

Moxy Ox — Software Engineer

July 2011 – December 2013, Arkansas

- Led development of custom web applications and **CMS**-driven websites, helping clients improve branding, content management, **SEO**, and conversion rates
- Collaborated closely with designers and brand strategists to deliver high-impact, user-focused web experiences tailored to clients' business goals and market needs

Freelance — Web Developer

2008 - July 2011, Arkansas

- Developed custom **WordPress** themes and plugins tailored to client needs, ensuring responsive design, performance, and SEO optimization
- Delivered end-to-end web solutions for small businesses and agencies, including site architecture, plugin integration, and content management training
